Brad Simmons, owner of the new Salon on 4th Hair Studio, said he realizes Danville is home to a number of salons. Some business owners may view this as competition. Simmons, however, said the salons here stay “run over with business” and that there definitely was room for another quality hair salon.

“There was a need,” Simmons said. “People will come from all over to get their hair done by a good stylist.”

And from what people were telling Simmons they wanted out of a salon — good location, something different, a well-designed facility, affordability — Simmons came up with Salon on 4th, 460 S. 4th St., next to 4th Street Deli.

The 1,000 square-foot salon boasts the integrity of an old building with its high ceilings and classic charm, but offers a twist as it was fitted out to appeal to its modern clients. He added that his stylists offer their skills in an agenda-free and positive atmosphere, and sincerely want to work with

the client to ensure he or she leaves completely satisfied and confident.

Simmons said he currently has two “rock star” stylists working for him — Andro Crawford and Heather Corman — who both are mas-

ter designers and stylists, and have the skills to accommodate men, women and children with services ranging from cut and color to waxing. They work by appointment, but walk-ins also are welcome.

Simmons said people often wonder, “Are they really that good?” to be able to do quality work on the potential time restraints of a walk-in customer.

“They are that good,” Simmons said.

So you know

■ Salon on 4th officially opened for business June 20. To continue celebrating its grand opening, the salon is offering clients a two-for-one deal — bring a friend and you both receive half off your service.

Linux update

The newest version of TEENpup has been released. TEENpup 2009 Legacy is the fifth release of TEENpup, which is based on Puppy Linux 2.14.

Among the features of the latest TEENpup include a color scheme similar to Vista. A help manual for the OpenOffice.org office suite also is included.

In addition, most commonly known file types automatically are recognized and opened without further tweaking. There also is a Magic Scripts feature that offers drag and drop file conversions.

The file size of TEENpup 2009 Legacy is just under 700MB, so it fits onto a regular CD.
